Please amend claim 3 as follows:

Sub 1  
A3 3. A method of treating an individual having a neoplastic disease [pathophysiological state], comprising the step of administering to said individual [a pharmacologically effective dose] an amount of the composition of claim 2 effective to inhibit neoplastic growth.

Please amend claim 5 as follows:

A4 5. The method of claim [4] 3, wherein said neoplastic disease is selected from the group consisting of breast cancer, colon cancer, ovarian cancer, glioma, osteosarcoma and haemopoietic cancers.

Please amend claim 6 as follows:

A<sub>5</sub> 6. The method of claim [4] 3, wherein said composition is administered in a dose of from about 0.1 mg/kg to about 100 mg/kg.

Please amend claim 7 as follows:

Sub A<sub>2</sub> 7. A method of treating an individual having ovarian cancer, comprising the step of administering to said individual [a pharmacologically effective dose of a pharmaceutical composition, comprising a recombinant adenoviral vector encoding an pro-apoptotic *bax* gene and a pharmaceutically acceptable carrier] an amount of the composition of claim 2 effective to inhibit ovarian cancer growth.

Please amend claim 9 as follows:

Sub A<sub>3</sub> 9. A method of sensitizing tumor cells to chemotherapy and/or radiotherapy in an individual, comprising the step of administering to said individual [a pharmacologically effective dose of a pharmaceutical composition, comprising a recombinant adenoviral vector encoding an pro-apoptotic *bax* gene and a pharmaceutically acceptable carrier] an amount of the composition of claim 2 effective to sensitize said tumor cells.
